

Teknomatik

We are your cooperator CNC Machining

Our priority is to provide the customers the highest quality products that meet the highest requirements.

We are able to create such products because of the modern machinery and highly qualified staff.

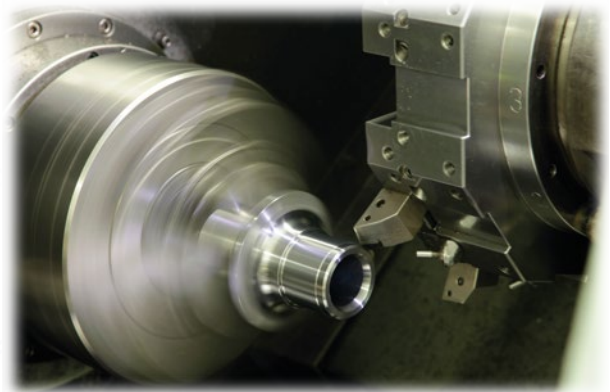

We are open to introducing innovations that can improve the quality of our services.

We specialize in machining with the use of CNC machines.

We pay particular attention to the accuracy, reliability and speed of the provided services.

Machining:

- Lathework (dmax = 200, Lmax = 1000mm)
- CNC milling (x max = 1000, y max = 600, z max = 500)
- Surface grinding
- Shaft grinding
- Drilling
- Threading

Welding method:

MAG •
TIG •

We also offer:

- Assessment of conformity with the minimum / essential requirements - CE
- Light Curtain safety distance measurement
- Adaptation of machines to health and safety requirements

We also cooperate with companies which

- specialize in: hardening, painting,
- galvanizing, black oxide coating, anodizing.
